

Arithmetic tasks for Rani

Make sure children are relaxed. Chat with them : ask them ~ who is their best friend, what is their favourite game ... Playing simple games may also help. When the child seems relaxed then you can introduce the testing tasks. Give children time to become familiar with the tool and the task. Each tester has several sample tests. Let the child practice for a few minutes with one sample paper. For actual testing use a different one. If the child makes a mistake, let her have another chance. Show her a different problem. If she is struggling with subtraction, take her to number recognition and then come back to subtraction. Work with the child, until you are sure of what the child is able to do comfortably and confidently.

Number		Subtraction		Division
36	72	$\begin{array}{r} 56 \\ - 38 \\ \hline \end{array}$	$\begin{array}{r} 73 \\ - 56 \\ \hline \end{array}$	$2 \overline{) 441}$
