

WhatsApp Message Week 1

Hello!

We hope that the community math learning camp has begun and you have become friends with children! The following videos will help in building conceptual understanding in mathematics.

Please click on the links to watch the videos.

- **Reading number chart in multiple ways** – Use this video to find some interesting ways of reading a number chart.

<https://youtu.be/gdVJMOZR62k>

Making a chart like this helps improve recognition and understanding of numbers.

- **Place value with matchsticks** – Want to build a strong understanding of ones and tens? Let's see how to understand number place values using everyday household materials.

<https://youtu.be/Uve1x6TGg2g>

Note that one can replace matchsticks with any other easily available local materials like bamboo or wooden sticks, straws etc.

- **Addition with single digit numbers** – Have you ever learnt how to do addition through stories? Come let us watch this video to understand the concept of addition using stories.

<https://youtu.be/Xb7tpEtI7Ag>

One number and multiple ways to get it by addition - Have you ever seen multiple ways of obtaining a number through addition? Come let us watch this video to find different combinations of addition to get the number 10.

<https://youtu.be/LBgXjJ9273w>

We would like to keep sharing such videos with you in the future. In case, you would not like to continue receiving these messages then please respond by typing 'No'. To watch similar videos and access games, please log on to www.prathamopenschool.org.

WhatsApp Message Week 2

Hello,

We hope that you and your children watched last week's videos and used them to practise math. Let's watch some new videos to understand some other concepts in math.

Please click on the links to watch the videos.

- **Place value** – let us watch this video to understand place value of numbers.

<https://youtu.be/E55KudjelcQ>

In a similar way, make a few different numbers and find the place value of their digits.

- **Simple Subtraction** – Lets understand single digit subtraction through stories. Please watch this video carefully and try to understand.

<https://youtu.be/2oEugSicMDY>

- **Oral addition and subtraction** – Learn to do addition and subtraction orally using a number chart.

Addition <https://youtu.be/Skhg63VEZ1k>

Subtraction <https://youtu.be/r1qiOPYWcco>

Similarly, make a chart for yourself and try to solve addition and subtraction problem sums orally. We would like to keep sharing such videos with you in the future. In case, you would not like to continue receiving these messages then please respond by typing 'No'. To watch similar videos and access games, please log on to www.prathamopenschool.org.

WhatsApp Message Week 3

Hello,

We hope that you and your children watched last week's videos and used them to practise math. Let's watch a few more videos to understand some other concepts in math.

Please click on the links to watch the videos.

- **Ones and tens** – Let us watch this video to understand place and place values in two-digit numbers. <https://youtu.be/2ke8tgWRSN8>

In a similar way, find the place and place values of digits in different numbers.

- **Addition of two-digit numbers using ones and tens (without borrowing)** – Use this video to understand addition without borrowing through word problems.

<https://youtu.be/f7jHxNREhyc>

- **Subtraction of two-digit numbers using ones and tens (without borrowing)** – Use this video to understand subtraction without borrowing through word problems by using bundle-sticks.

<https://youtu.be/pkyAXgud4vY>

Use school textbooks to find similar questions for practice. We would like to keep sharing such videos with you in the future. In case, you would not like to continue receiving these messages then please respond by typing 'No'. To watch similar videos and access games, please click on the link to visit www.prathamopenschool.org.

WhatsApp Message Week 4

Hello,

We hope that you and your children have been watching the videos shared in the previous three weeks and have used them to practice math. Let's watch new videos this week as well to understand a few more concepts in math. *Please click on the links to watch the videos.*

- **Understanding numbers using tens and ones** – Watch this video to understand place values of two-digit numbers and practice using different numbers.

<https://youtu.be/7LxIWDikWq8>

Similarly, find the place and place values of digits in different two-digit numbers.

- **Two-digit addition (with carryover)** – Use this video to understand addition in everyday life with carryover through word problems.

<https://youtu.be/S55uJSuOIOQ>

- **Two-digit subtraction (with borrowing and carryover)** - Use this video to understand subtraction with borrowing and carryover through word problems using bundle and sticks.

<https://youtu.be/gAynJOHfBZU>

Use school textbooks to find similar questions for practice. To watch similar videos and access games, please click on the link to visit www.prathamopenschool.org.
